**Lichtvision Design opens Shanghai Office**

Shanghai, August 2021 - Lichtvision Design expands footprint into the mainland.

“Having been active in the Asian market for over 15 years and establishing our Hong Kong office almost 10 years ago, this was a logical next step to take,” comments Clemens Seipelt, Regional Director Asia, “especially considering our ever-growing project portfolio in Mainland China with around 15 active developments at this moment.”

Moving into the mainland, Lichtvision will be more accessible, foster deeper relationships with our clients and consultants, and most importantly, have easy and direct access to our project sites. Our Hong Kong office will continue to be involved in projects throughout the Greater Bay Area and Southeast Asia, while the new studio will fully concentrate on our Mainland China projects.

Shanghai will share the advantages provided by Hong Kong – cultural understanding, language, sharing a time zone and a common knowledge and experience pool between our 4 offices – while also benefiting from local representation and inspiration from Shanghai’s creative scene.

With our new office, Lichtvision continues to pursue the vision to drive the perception of built environments in Asia and following our mission to design places people remember. We look forward to cross-cultural collaborations with our clients in China, sharing our German Design and Engineering expertise and learning from one another.

**Lichtvision Design**

Working in cooperation with architects, investors, and operators since 1997, Lichtvision creates design-oriented lighting solutions which are innovative, sustainable and people based. We permeate architectural spaces and compose spatial arrangements, embracing challenges and transforming them into tailored design. While driving perception of built environments, we respect energetic and environmental demands and approach each project with a holistic and sustainable mindset.

**We design places people remember.**
