MAKE A WISH!

EcoSense & Lichtvision Design

Christmas is the time for giving and sharing, reflecting on the year gone by and looking into the future with visions and wishes for the New Year ahead of you. Most importantly it is a time when people get together to celebrate community, reunion, and harmony.

The base of Lichtvision and EcoSense's Christmas tree is an infinity mirror into which everyone was invited to place a wish that they are hoping to have come true. These illuminated, glowing messages were reflected multiple ways within the structure, creating a depth and sense of infinity as well as an affirmation of the wishes. Centered on top of the structure, large, triangular shaped shards were placed. They create an

abstract tree and were decorated with wishes by the Lichtvision Design team, all in the variety of languages spoken within the company. Imagine looking upon a pine forest next to an expansive glacial lake. The warm sunlight shines through the trees, reaching the cool, snow-capped terrain. The green hue of the trees gets reflected on the water. Looking through a wide array of trees your view might occur endless. The installation was created for communal interactivity and to help start a positive dialogue. It embraces reflecting upon the past, celebrating the present moment and making wishes for the future. Make a wish!
