

### GRIMMWELT: ENTER THE WORLD OF THE BROTHERS GRIMM IN THE FORM OF A MUSEUM

Once upon a time the brothers Grimm wrote their first fairytale. Today – it just opened in September – in the city of Kassel, there's a museum dedicated to Wilhelm and Jacob Grimm, the brothers who gave life to an enormous amount of fables and children's stories, the fundamental "German Grammar", and that were renowned as linguists and advocates of democratic ideas.

It's called Grimmwelt (the world of Grimm), was designed by Kada Wittfeld Architektur and is located right outside the center of Kassel, the native city of the famous writers, blending with the undulating, sloping landscape.

Comprised of a staircase that leads to a large terrace with a view of the urban surroundings, inside the museum develops around a central hall that presents and introduces the various fundamental parts of the exhibition.

The brothers Grimm were indeed not just great narrators of children's tales. So the German team of designers interpreted the various subjects with different atmospheres for each macro-theme of the exposition, from works on German linguistics, to politics, up to their collection of stories: the vast world of Grimm.
